DETAILED ACTION

Applicant's Response

1. Applicant's request for reconsideration filed August 29, 2005 is acknowledged. Currently, claims 1-21 are pending. Claims 13-21 remain withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being claims drawn to a non-elected invention. Claims 1-12 are under examination.

Withdrawn Rejections

2. In light of Applicant's amendment, the rejection of claims 1-12 under 35 U.S.C. 102(e) as being anticipated by Armstrong et al. (US Patent 6,099,469), is hereby, withdrawn.

Maintained Rejections

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 23-30 and 37-38 of U.S. Patent No. 6,099,469 in view of Lillig et al. (US 4,965,049) for reasons of record.

Response to Arguments

4. Applicant's arguments filed August 29, 2005 have been fully considered but they are not persuasive.

A) Applicant argues that the combination of the teaching of the '469 patent with the teaching of Lillig, and the modification of the '469 patent claims in view of Lillig as suggested by the Examiner, is based on improper hindsight. Applicant contends that absent an understanding of the applicability of reflex algorithms to combined immunoassays and clinical chemistry assays, those skilled in the art would not have been motivated to modify the '469 patented subject matter to provide the claimed apparatus. According to Applicant, such an understanding is [only] provided by the common written description of the instant application and the '469 patent.

In response, Applicant's argument to rebut the pending obviousness double patenting rejection based on the combination of Applicant's '469 patent and Lillig, that an understanding of the applicability of reflex algorithms is absent to those skilled in the art, is not on point and hence is not persuasive, because the teaching of reflex algorithms in order to provide an understanding of its concept, is provided, disclosed,

and published in Applicant's '469 patented invention. The fact that such an understanding is [only] provided by the common written description between Applicant's instant application and '469, has no bearing in the standard provided for making the ODP rejection, based on a combination of the '469 patent with Lillig for the teaching of incorporating a sample handling device. Since a sample handling device as taught by Lillig is automated to provide delivery of sample between different analyzers that run different assays or chemistry tests, it is unclear how the concept of reflexive algorithm presently programmed into multiple analyzers as in the '469 patent which appears to already require sample delivery and transfer to render it reflexive in function, cannot or is not, obviously extended or suggested to be extended to applications encompassing sample delivery between the analyzers, by those skilled in the art.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

5. No claims are allowed.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
